

LAYC Training Scheme Using Behaviour Strategies

Introduction

How do we get the kids to behave? Is there some magic ingredient to it all?

The course is aimed at Project Managers, Senior Playworkers and anyone who thinks that the kids behaviour dictates what they can or can't do in their club or group.

Content

The Using Behaviour Strategies course is based around group discussion and group exercises. Participants are initially to write a description of unpredictable/unexpected/out of control behaviour in their group which they might hope to get a solution to for future incidents.

There is a PowerPoint accompaniment to the session from which participants get a number of handouts.

Outcomes

By the end of the course participants will have:

- Discussed behaviour management strategies for children
- Discussed behaviour management strategies for staff
- Developed a plan to put them into place at their club or group
